## OPTIMUM ENERGY EFFICIENCY AND DURABILITY

Designed and tested for energy efficiency, Brighton™ wood windows and doors comply with stringent energy-efficient guidelines established by the government-backed Energy Star® program.\*

Brighton™ windows are available in eight standard and three optional exterior colors. Quaker's custom color capabilities are versatile enough to match any existing exterior color. All Brighton™ windows have extruded aluminum-clad, maintenance-free exteriors.

To provide long-term durability, all Brighton™ window interiors are built with solid, specially-treated pine, which can be stained or painted to match your home's decor.

The energy performance of each Brighton™ window is displayed on the NFRC (National Fenestration Ratings Council) sticker (pictured to the right), which allows you to accurately compare the efficiency of similar windows and patio doors.

Quaker Windows & Doors contain many components that are considered "green," including glass, wood and aluminum. So by choosing Quaker, you're not only getting beauty and function, you're helping the environment as well.

*\* Meets Energy Star® criteria with addition of Low-E and argon gas*

### BRIGHTON™ LS DOUBLE HUNG WINDOWS

- Unique jamb-liner system to reduce infiltration by wind, heat and cold
- Block and tackle balance system adjusts to the size of the window for easy cleaning and operation
- Even extremely wide windows seal completely every time with cam-locking hardware that exceeds all safety standards

### BRIGHTON™ CASEMENT & AWNING WINDOWS

- Casement and awning hardware neatly folds down into a pocket to avoid interference with window blinds
- Dual-sealed with bulb weather-stripping for extremely low air infiltration
- Wide-opening sashes and specially designed crank-out hardware for cleanability, strength and integrity
- Casement now available as a push-out model

### BRIGHTON™ GEOMETRICAL WINDOWS

- In-house craftsmanship and high-tech equipment allows Quaker to make almost any shape possible
- Choose from direct set models with wider viewing areas or sash set models with sightlines to match operating windows and doors
- Casings are available on curved geometrical shapes, assisting builders with installation
- Operating geometric windows are available in Double Hung & Casement models

### CLASSIC FIT® & HISTORIC FIT® REPLACEMENT WINDOWS

- Manufactured as a complete window, sealed and airtight for quick and easy installation
- Easily inserted into existing frame openings and can be stained or painted to your preferences
- Custom size with measurements to 1/4" increments

### BRIGHTON™ PRE-FINISHED WINDOWS

- Saves you post-installation time and expense
- Clean, stylish, smart, contemporary look
- From white to black, choose the pre-finished color you want, not the color you have to choose

### BRIGHTON™ SLIDING DOORS

- Energy-Star® performance courtesy of standard Low-E glass and argon gas
- Specially treated wood door panels and tempered, insulated glass with 10-year warranty
- Heavy-duty, high performance fiberglass sill and extruded aluminum exterior with smooth-rolling track

### BRIGHTON™ SWINGING DOORS

- Choose a plush wood appearance courtesy of an 8" bottom rail or go even richer with a 10" bottom rail option
- Standard with high performance tempered Low-E glass with an argon gas fill and 10-year warranty
- Extruded aluminum anodized sill for increased traffic and thermal performance
